AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph at page 33, lines 11-29, of the specification with the following amended paragraph:

At step 1457, the system will determine if file location information has been given by the user. If desired, the system may search the user equipment for file source devices. If file source devices are found, appropriate upload options may be presented at step 1459. These options may be presented to a user in the form of device buttons ~~1410~~ 1420 of FIG. 14A. If no devices were found at step 1458, default options may be presented to the user at step 1460. Default options may include, for example, an Internet upload box or a list of possible storage devices that the user equipment may include. At step 1461, a user may be provided with an opportunity to select a file location for upload using the presented options. At step 1462, the selected file may be uploaded. If desired, at step 1472, the system may convert file formats for files that are being uploaded (e.g., convert JPG files to MPEG files) and/or may convert analog signals to digital file format.
